

FLEET INFORMATION PLATFORM

BECAUSE WE UNDERSTAND THAT
INFORMATION IS ONE OF YOUR
GREATEST ASSETS

FLEET INFORMATION PLATFORM

The Link₂ Fleet Information Platform collects, connects and analyzes detailed apparatus information from a multitude of sources and makes it available to key decision makers. The comprehensive system increases apparatus safety, reduces maintenance and operating costs, improves department efficiency and enhances “on scene” command information.

COLLECT...

Where does the data go?

The *Link₂* monitors the chassis CAN bus, OEM installed analog and multiplexed electrical systems, as well as its own digital and analog inputs.

Key events are recorded, time stamped and transmitted via secure WiFi to your personal web page.

How does it get there?

Chassis CAN bus
Engine, Trans and ABS

System
Voltage

- Sensors and Interlocks
- Pump Shift
 - Water and Foam Tank Levels
 - Throttle Ready
 - OK to Pump
 - Pump Overheat
 - Flowmeters
 - Park Brake Status
 - Master Warning Switch
 - Custom Digital Inputs
 - Custom Analog Inputs
 - Custom Frequency Inputs

Seatbelt Monitoring
System

Vehicle Multiplex
Circuits

Tire Pressure and
Temp Sensors

How can I see the information while on the apparatus?

View₂ XL
CAN based Color Display
Video Input

View₂ LT
CAN based
Compact Form
Full Color Display

View₂ SD
Seatbelt Occupancy
Alarm Silence
Rocker SW Cutout

View₂ XP
Seatbelt Occupancy
Speedometer
Tank or Fuel Level

CONNECT...

Standard IEEE 802.11 for wireless connections

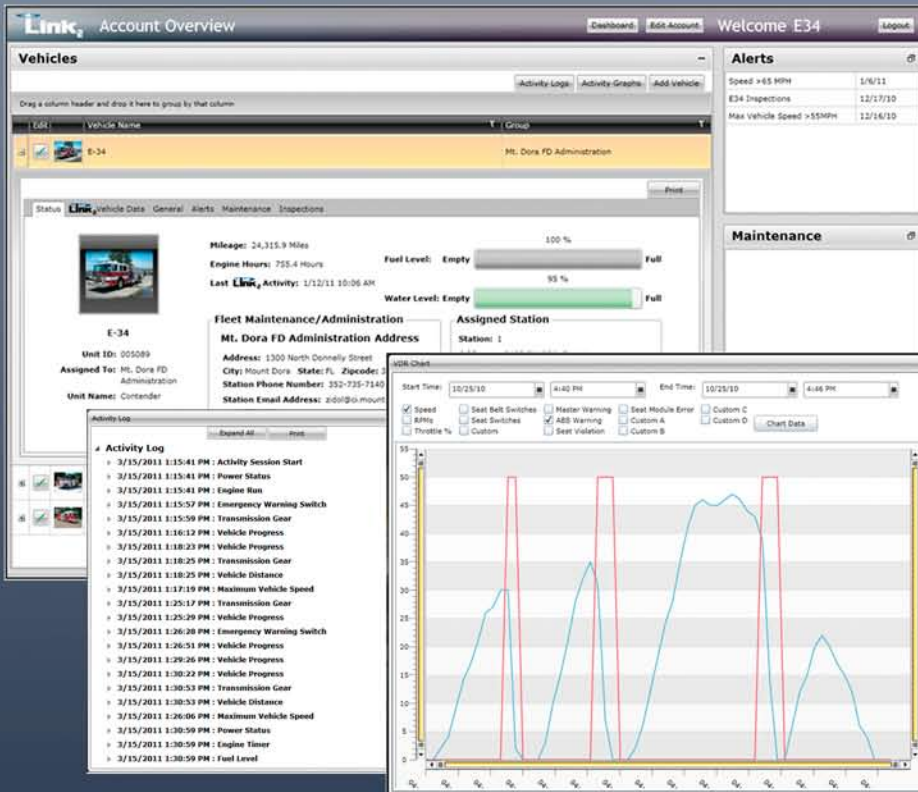

Vehicle data is encrypted and transferred securely to Link₂ online servers through your department's WiFi connection.

Easily configured to access in-vehicle WiFi "hotspots"

ANALYZE...

Log in to your secure web portal and quickly access current and historical data uploaded from your Link₂. Each apparatus database contains all the chassis, body and parts information that your service provider requires in a convenient, centralized location. Additionally, you can schedule and track regular maintenance of your entire fleet, set up email notification of key events, graph critical functions including speed and complete your apparatus inspections, all from your online account.

- ✓ EMAIL NOTIFICATIONS
- ✓ USER SECURITY
- ✓ SCHEDULE AND TRACK MAINTENANCE
- ✓ CREATE INSPECTIONS
- ✓ TRACK INVENTORY
- ✓ TIME STAMPED EVENTS
- ✓ GENERATE ANY CUSTOM GRAPH THAT YOU NEED FROM THE DATA
- ✓ INFORMATION WILL NOT BE DELETED, VIEW IT ANYTIME
- ✓ FLEXIBLE AND ROBUST SITE
